Dear Hiring Manager,

As a final-year computer science student at Universiti Teknologi Malaysia, I was thrilled to see the internship opportunity at TM Research & Development. For your information, the course that I take are specifically under Network and Security area which related to your company. I sincerely hope that my 3.72/4.00 CGPA, excellent knowledge of networking area and great teamworking and communication skills will make me a worthy candidate for this internship.

I understand that you're looking for an intern who's eager to learn, but also ready to provide immediate value to the firm as an assistant to your team.

It's incredibly inspiring that TM R&D has receive prestigious World Communication Awards 2020. The innovation really matters, and I'd love to be part of the change. I want to make a positive difference, too, and I believe that starts with the chance to learn from the best at TM R&D.

I'd love to discuss in more detail how my skills and knowledge could become an asset to TM R&D.

Best regards,

Adibah Aslah
Computer Science student
